EMPATHY MAP

AFFINITY DIAGRAM

Group1: Navigation & Findability

Scrolls endlessly trying to find recently purchased games

Difficult to locate games in the library

Switching between the store and library feels inefficient

Group2: Information Architecture & Organization

There is no category organization for games in the library

Some discounted games are mixed together on the store page

Too many game tags, making it hard to choose

Menu has too many layers

Group3: Visual Hierarchy & Clarity

Everything looks the same, can't tell what's important

Reviews are not well organized

Too many game recommendations on the first screen

AFFINITY DIAGRAM

Group 4: Feature Integration

Can't tell if a game is installed without opening the game detail page

No clear sign if the current price is the best deal

Group 5: Mobile Usability

The UI looks like a desktop website on a mobile screen.

Filters are not easy to access on mobile.

KEY INSIGHT ✨

" Users feel overwhelmed by **too much information** and **struggle to make decisions** because there's no clear guidance "

USER PERSONA

NAME: AUSTIN JAMES

- **Age:** 21
- **Occupation:** University student
- **Location:** Chiang Mai, Thailand
- **Device:** Smartphone , Laptop / PC , Ipad

*"I want to find the **best deals** and **manage my library quickly** without getting lost in a sea of irrelevant game banners. "*

HIS MAIN PAIN POINTS:

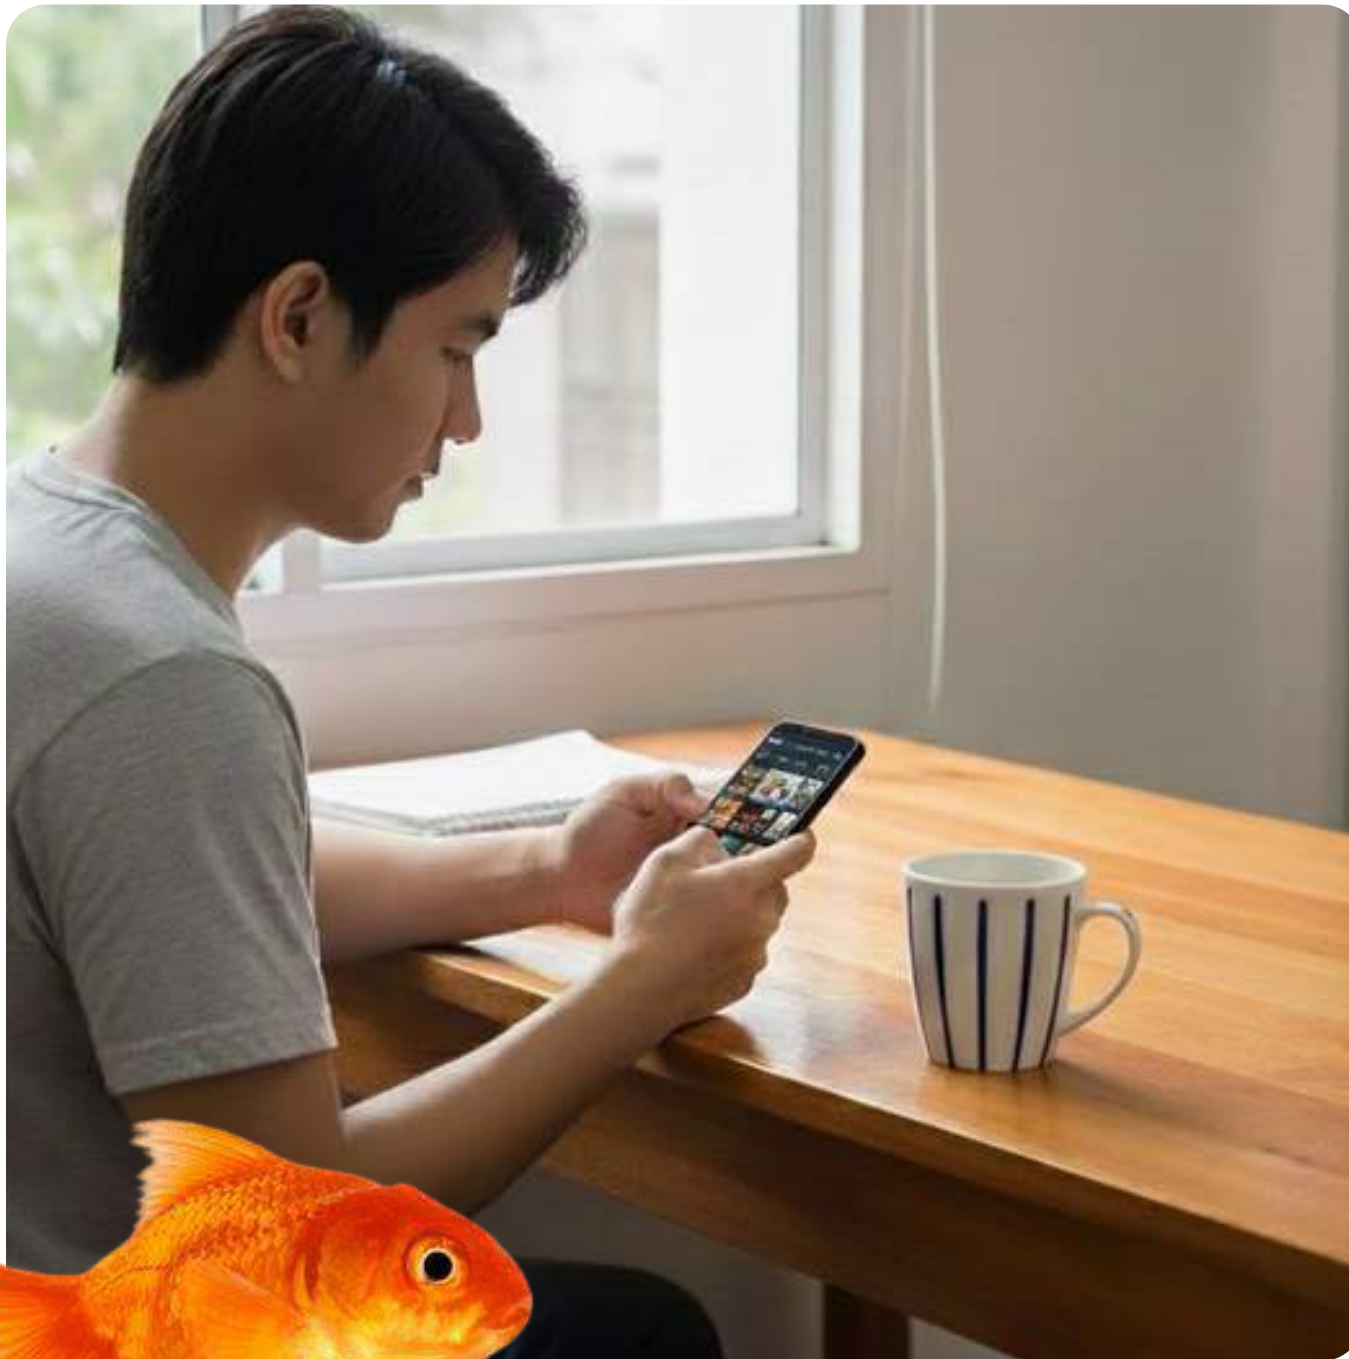

Too many game recommendations

The home screen is overwhelmed

Discounted games are
mixed across categories

No clear category organization
in the game library

USER PERSONA

HIS GOAL:

Easily identify game types when browsing discounts

Use the app without spending too much time learning

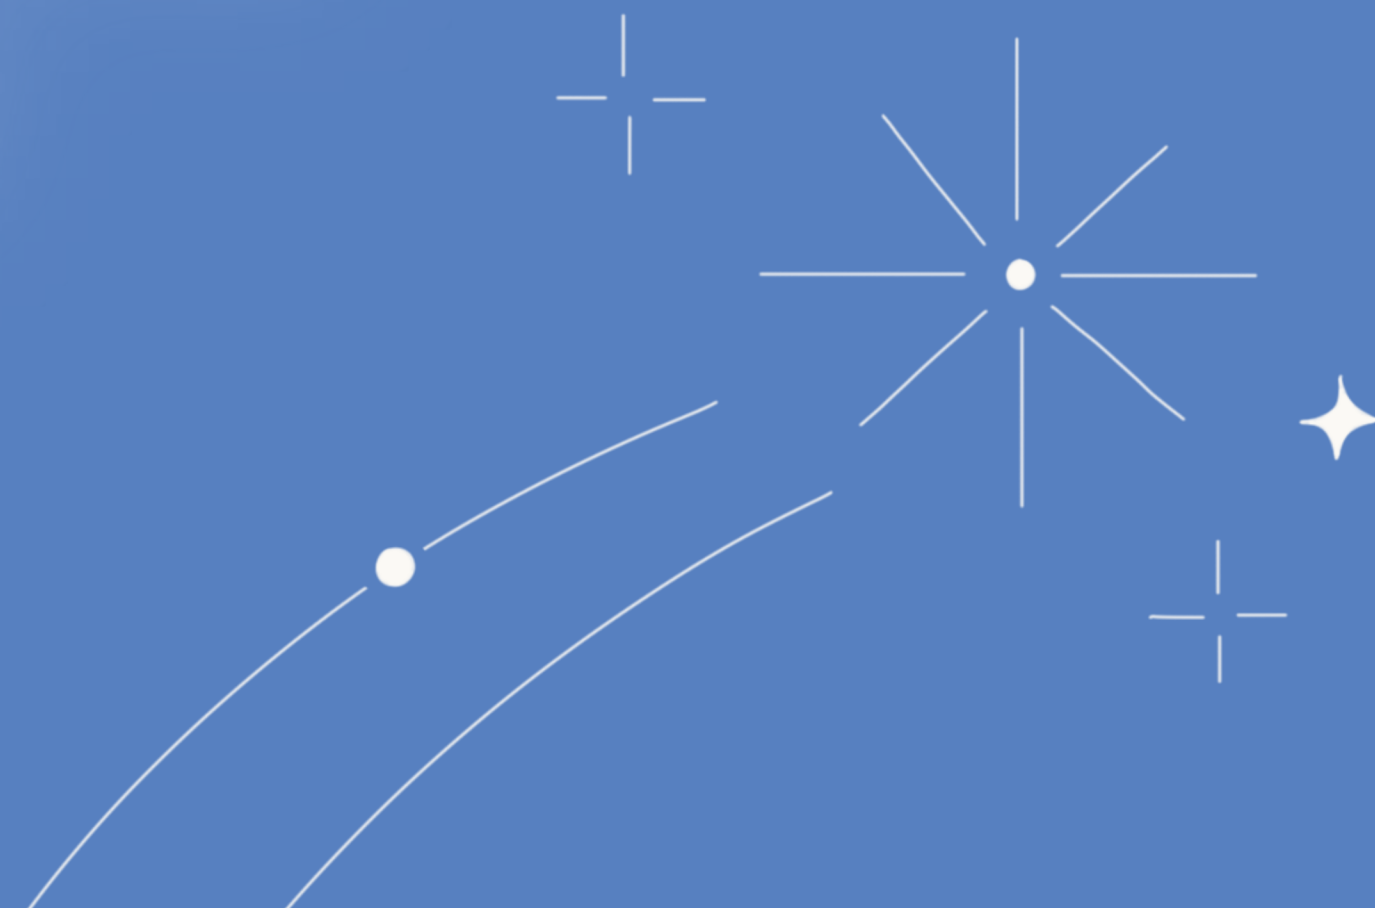

Feel comfortable and not overwhelmed when using the app

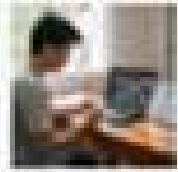

Make smart spending decisions as a student

USER INFO

Austin James

"I want to find the best deals and manage my library quickly without getting lost in a sea of irrelevant game banners."

SCENARIO

He opens the Steam mobile app to check Winter Sale deals, goes to the game library to see what types of games he usually plays, returns to the Winter Sale page to search for similar games, and then decides whether to purchase a discounted game.

EXPECTATIONS

- Quickly understand what types of games are available in the Winter Sale
- Identify preferred game genres from the game library
- Easily find discounted games that match preferred genres
- Navigate between the store and the library without confusion
- Make confident purchase decisions based on clear information

STAGE	OPEN APP	STORE PAGE	BROWSE WINTER SALE	CHECK LIBRARY	APPLY FILTERS	COMPARE WITH SALE	GAME DETAILS	DECISION	EXIT APP
GOALS	Find discounted games quickly	Understand available game types	Identify interesting sale games	Identify preferred categories	Narrow down games by preferences	Determine if the current price is a good deal	Learn more about the game before purchasing	Decide whether to purchase a discounted game confidently	Complete session and exit smoothly
ACTIONS	Opens the Steam mobile app	Scrolls through the home/store page	Enters the Winter Sale section	Scrolls through the library page	1. Opens filter menu 2. Selects multiple criteria	1. Views current price 2. Checks discount percentage 3. Compares with regular price	1. Reads game description 2. Watches gameplay videos 3. Reads user reviews	Decides to purchase the game or add it to the wishlist	Leaves the app
THOUGHTS	"I want to find a good discounted game."	"What type of games are these?"	"These games are mixed together."	1. "Which games have I already purchased?" 2. "What type of game is this?"	"I want to narrow this down."	1. "Is this really a good deal?" 2. "Should I wait for a bigger discount?"	1. "Does this game look fun?" 2. "What do other players think about it?"	"This looks like a good deal for me."	"That took longer than I expected."
PAIN POINTS	Too many games on the first screen	No clear categories on the home screen	Discounted games across many categories	Must open game detail pages to see game types	Filters are not easy to access	1. No price history available 2. Unsure if this is the best price	1. Too much information at once 2. Reviews are not well organized	1. Unsure if the game is worth the price 2. Not confident in decision	Switching between the store and library feels inefficient
EMOTIONS	 Overwhelmed	 Confused	 Frustrated	 Tired	 Annoyed	 Skeptical	 Curious	 Neutral	 Slightly Frustrated
TOUCHPOINTS									
OPPORTUNITIES	The app should recommend discounted games based on the user's interests and owned games	The app should display discounted games with clear genre grouping	The app should organize discounted games into clear categories	The app should allow users to filter and browse the library by game categories	The app should provide easy-to-use genre and price filters on the sale page	1. Display price history graph 2. Show historical low prices	1. Organize information with tabs or sections 2. Highlight most helpful reviews	The app should clearly indicate when a deal is at its best or lowest price to help users decide with confidence	The app should streamline navigation between the store and the store

PROBLEM SUMMARY

1

Users want to find the best deals quickly but struggle with unclear navigation.

2

Games are poorly categorized and mixed together.

3

Too much information makes important details hard to notice.

4

Users lack clear signals to judge whether a deal is worth buying or waiting.

5

Mobile usability issues make browsing inefficient.

OUR DESIGN APPROACH

" Simplify Decision Making
+ Help Users Get Best Value "

THANK *YOU*

FOR YOUR ATTENTION
